

# CANNA COCO

**ALL VALUES ARE PER GALLON**

**rooted cuttings - 18 or 24 hours of light PH 6.2**

**rhizotonic**

**day 1 - 4** 18ml Use Rhizotonic and fresh water for first 4-5 days After roots appear

Use blue light during veg stage and first 2 weeks of flower to improve internodal spacing & to reduce stretching

**vegative stage - 18 hours of light PH 6.2**

	Coco A	Coco B	Rhizotonic	CannaZym
<b>week 1</b>	4ml	4ml	18ml	
<b>week 2</b>	6ml	6ml	10ml	10ml
<b>week 3</b>	8ml	8ml	10ml	10ml

**ALWAYS:**  
Add Coco A and dilute in reservoir before adding Coco B !!!!  
Do Not Mix them together in concentrated form

**PROGRESSIVE GROWTH HYDROPONICS**

**Transition to flower: (hardest time of a plants life)**  
All transplanting should be done. Make sure daytime temp is around 80°. Very important that nighttime temperatures stay above 70°, this will improve your internodal spacing & reduce stretching. First week of flower keep your lights at least 24" above plants

**TOLL FREE 1-877-756-4769**

**flowering stage - 12 hours of light PH 5.7**

	Coco A	Coco B	Rhizotonic	PK 13-14	Canna Zym
<b>week 1</b>	10ml	10ml	3ml		10ml
<b>week 2</b>	12ml	12ml	3ml		10ml
<b>week 3</b>	10ml	10ml	3ml		10ml
<b>week 4</b>	9ml	9ml	3ml	6ml	10ml
<b>week 5</b>	8ml	8ml	3ml	6ml	10ml
<b>week 6</b>	8ml	8ml	3ml	6ml	20ml
<b>week 7</b>	7ml	7ml			20ml
<b>week 8</b>					

**CANNA COCO**

**Use only Canna Coco Mix as your growing medium. Canna Coco is specially designed to work Only with the Coco Growing Medium**

**Do Not use hydrogen peroxide with Canna products.**

**When Transplanting:**

Pre Soak grow medium with 18ml / gallon of Rhizotonic & fresh water. First watering after transplant also use Rhizotonic & water

**Ripening stage:**

Use fresh water only for minimum 7 days  
Lowering temperature in dark cycle during last week will promote higher crystal & resin production.

**If your plants become stressed at any stage:**

Some stresses can be caused from: lights being too close / over fertilization / insect infestation / temperature fluxuation  
Raise the lights to 24" , water plants with 18 ml / gallon of Rhizotonic and water for 2 waterings, when plants show signs of growth again, continue with regular feeding program.

Ensure that your plants dry out between watering. Once a month pass lots of water (2X usual ) through pot for removal of salt buildup
