Growing Medium**

**Grotek™ Three
Component Gen-X
Plant Effects Nutrient**

Grotek™ VitaMax

Eight 5" Net Pots

Seed Starter Cubes

Illustrated Instructions

Grotek™ Three Component Gen-X™ Plant Effects is a three part organic based system for optimum plant development. Designed for all types of plants and growers, it is a unique combination of organic

and inorganic raw materials along with natural chelating agents. Gen-X offers perfect nutrient ratios for optimum growth so that growers can custom mix a complete feeding program for almost any type of plant. From seeds or cuttings to the flower and fruiting stage, Gen-X provides a complete formula enabling the grower to add components at various concentrations throughout the growing cycle. The natural chelating agents used in Gen-X produce compounds in a solution similar to those found inside the plants and these can very easily assimilated in plants.

Grotek™ VitaMax™ is a scientifically created formula designed to encourage better root development, larger buds, blooms, fruits and flowers. Designed to be used as an additive to your regular nutrient, VitaMax helps increase plant development at the blooming and fruiting stages and reduces plant stress. Great for transplanting and rooting, VitaMax is a plant growth & bloom enhancer that contains many essential macro and chelated micro elements along with natural B vitamins. This product may be used up to the last ten days of flowering.

The **junglegarden™ Grow System** houses 8 plants, that enable you to grow a lush garden indoors or outdoors, year round! Plants grow in a soilless media that provides excellent air to water ratio for optimum growth and enhanced yield over conventional soil gardening methods.
