

## LIQUID KARMA™

Bio-catalyst Plant Stimulant

Formulated by a PH.D. Plant Physiologist

The introduction of Liquid Karma™ represents a major and significant breakthrough in plant nutrition. This is because Liquid Karma™ contains a full complement of metabolically active organic compounds not found in regular plant foods or supplements. These unique compounds are absorbed immediately and act as regulatory signals, activators or catalysts to produce synchronized and accelerated growth under all conditions. Liquid Karma™ functions as a growth engine because its high metabolic activity produces a large amount of energy which is immediately transformed to growth.

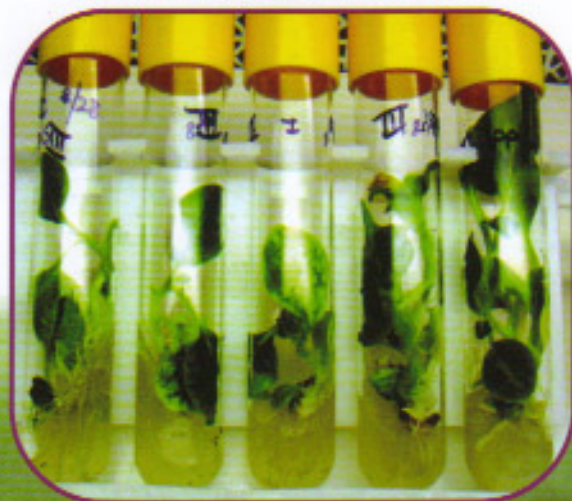

### Benefits of Using Liquid Karma™

Extensive research and field trials indicate that Liquid Karma™ produces beneficial results during every phase of plant growth. Starting with seed germination and following through to vegetative growth, budding and flowering, the continued use of Liquid Karma™ ensures optimal plant growth at every stage. In addition, because of the presence of high concentrations of B-complex vitamins and plant hormones in Liquid Karma™, the product has been shown to be very effective in protecting plants from transplant shock, and in promoting the rooting of cuttings.
