

Unlock the full power of your favorite nutrient solution with

PURE BLEND

T H E O R I G I N A L

Pure Blend the original organic compost solution.

Available in metabolic grow and bloom formulas. Pure Blend has proven to be the missing link for today's high powered hydroponic solutions. Used in thousands of gardens, Pure Blend has become a staple organic supplement, used in conjunction with the leading brand in hydroponic nutrients. Pure Blend has proven to increase the production of sugars and oils which are vital to enhancing the taste in all fruits, vegetables and herbs. Pure Blend also discovered that when mixed with nationally known synthetic hydroponic solutions, Pure Blend erased an age old problem of salt build up and reduced the amount of synthetic nutrients considerably.

Pure Blend also helps in achieving that "grown in soil" mouth watering taste. It promotes lush green healthy vegetation, increases flower and fruit set, and enhances the sweet aroma of your special flowers. Expect to grow larger fruits, flowers and vegetables with more compact plants and shorter internodes.

Pure Blend is brewed to perfection, unleashing the best mother nature can provide. Contains an abundance of healthy beneficial microbes that live and thrive within the soil or soilless grow substrate, creating age old results of bio-dynamics.

Pure Blend is the number one selling organic plant stimulant supplement in the US and Canada – accept no substitute.

Pure Blend is available in 1/2 oz. (15 mil.) sample hydropaks, 32 oz. (1 liter), 1 gallon (4 liter), and 2.5 gallon (10 liter) size containers.

Call us toll free to find out more about the original and much copied Pure Blend metabolic grow and bloom formulas. We will send you a free hydropak sample and be happy to locate a dealer nearest you. Dealer inquiries are welcome.
